#### **DETAILED ACTION**

#### Election/Restrictions

Applicant's election of Group I (claims 1-5) in the reply filed on July 19, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). The Restriction Requirement is made FINAL.

### Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because it is not a single paragraph and is more than 150 words. Correction is required. See MPEP § 608.01(b).

Art Unit: 1724

## Claim Objections

Claims 4-5 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, claims 4-5 have not been further treated on the merits.

### Claim Rejections - 35 USC § 112

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In steps "b" and "d" of claim 1, it is uncertain what Applicants intend by the "a" appearing at the end of each line. If –absolute-- is intended, Applicants are requested to write that out for the sake of clarity.

### Claim Rejections - 35 USC § 102

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 9609882 A1. WO 9609882 A1 discloses a method as claimed. The presence of abrasive components does not appear to be discussed. Only organic materials are discussed. Thus, it is submitted that since abrasive components are not discussed, they would inherently be present in "low" content. This is consistent with one objective of the invention – longer valve life. If abrasives were present in anything other than "low" levels, the valves would rapidly wear due to "abrasive" effects."

Art Unit: 1724

#### Conclusion

This is a CONTINUATION of applicant's earlier Application No. 09/980,424. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record. Accordingly, THIS ACTION IS MADE FINAL even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Robert J Popovics at telephone number (571) 272-1164.
